SWISS DESIGN SINCE 1998

SIMON — the quiet whirlwind

3D oscillation mode for optimum distribution of the air flow

despite being powerful, the 3D fan is extremely quiet

remote control is magnetically attachable to the device

Quiet, powerful and provides all-round refreshment: with his 3D oscillation mode and a wind distance of up to 10 meters, Simon ensures optimum air circulation in large rooms too. Despite being powerful, the 3D pedestal fan is extremely quiet. Whether you require a gentle breeze or refreshing wind, the air flow can be easily adjusted with a range of individual settings to choose from. Thanks to power memory function, Simon remembers the last settings selected and with a practical foot-operated switch stylish Simon is easy to switch on and off. Whatever your interior style may be, Simon will fit in perfectly thanks to his modest design and textile cover. He also has intelligent features which include a mode that simulates natural wind conditions, 10 different speed settings, a 1–7 hour timer and a remote control that is magnetically attached to the device. And the quiet whirlwind is easy to look after too: you can unscrew his front and rear grilles and put the textile cover in the washing machine. As a 3D fan, Simon cleverly combines function and aesthetics. What more could you want?

White

Specifications

Power: 28 W / 100–240 V / 50/60Hz

Natural Breeze mode / 10 speed levels

3D oscillation mode / 10 m wind distance

Dimensions: 276 x 820 x 261 mm (w x h x d)

Weight: 4.6 kg / Sound level: 25–52 dB(A)
